## 856T Style

A = height from floor to chimney connection upwards
$A=$ height from floor to chimney connection upwards
$B=$ height from floor to $c / c$ chimney connection rear
$B=$ height from floor to $\mathrm{c} / \mathrm{c}$ chim
$C=$ height from floor to air inlet
$C=$ height from floor to air inlet
$D=$ height from floor to lower edge of hatch
$\mathrm{E}=$ minimum height to sloped ceiling from the centre of the chimney

[^0]
[^0]:    * If the stove is placed on a hearth plate made of glass for example (accessory), the height from the floor is affected by a distance
    corresponding to the thickness of the hearth plate. Also applies to separate glass hearth plates (accessory)
    ** To prevent discolouration of painted non-flammable walls we recommend that the same side distance as to combustible walls is used.
